Immediate Release  
April 22, 2008

## **econoGreen's Summer Solution**

SALEM, Mass—April 22, 2008- EconoGreen is a local business which is located in the Enterprise Center at Salem State College and they may just have a solution for rising gas prices this summer. The Highway Glider which mounts on your front license plate will improve mileage on any passenger car while driving on the highway.

At six dollars for two sets, the Highway Glider is an affordable way to cut back on rising gas expenses. The Highway Glider website also lets you personalize the text on the Highway Glider. An added benefit to buying the Highway Glider is that a portion of the profit is donated to children in Africa.

Consumer Alex Hanson has said, "I can definitely see a difference now that I have the Highway Glider on my car, and it was so easy to put on!"
