econoGreen
Backgrounder

EconoGreen was started in 2007 by Travis McGee. It is based in the Enterprise Center at Salem State College. They have one product called the Highway Glider, with more products coming out next year.

- The Highway Glider sells for \$6.88
- You get 2 sets plus spare pieces
- The money you pay is donated to children in Africa
- econoGreen makes no profit by selling these
- All parts are made in the United States
- Saves \$20-60 dollars per year

EconoGreen is hoping to partner with more foundations in the near future to cut the cost of the Highway Glider even more. EconoGreen just wants to make the Earth a better place and believe that using the Highway Glider is the first step of many in the right direction.
